

## **CDM and Cloud Security**

SBA CISO Beau Houser, DHS CISO Paul Beckman and USPTO CIO Jamie Holcombe discuss moving from a perimeter security model to one that balances security with access.

Fri, 07/19/2019 - 15:19

Emerging technologies are requiring information security experts to fundamentally rethink how they approach security. As more government agencies shift their data to the cloud, they must also move from a perimeter security model to one that balances security with access. Similarly, with faster-moving threats and a growing number of networked devices, agencies seek to use continuous diagnostics and monitoring tools to protect their assets.

- Beau Houser, Chief Information Security Officer, Small Business Administration
- Paul Beckman, Chief Information Security Officer, Department of Homeland Security

- Jamie Holcombe, Chief Information Officer, U.S. Patent and Trademark Office
