

[Jeff Shilling, CIO, National Cancer Institute](#)

Season: 2

| Episode: 17

Data and technology are at the heart of the research institute's approach to treating cancer.

Thu, 08/15/2019 - 11:43

Jeff Shilling discusses data and technology efforts behind the nation's largest funder of cancer research. He shares optimism toward technology's future role in processing cancer data for the research community and furthering research and discovery in the mission to treat cancer.
