

[Gordon Bitko, CIO, FBI](#)

Season: 2

| Episode: 19

The intersection of technology and national security is a top focus for the intelligence agency.

Tue, 08/27/2019 - 09:45

Gordon Bitko discusses FBI's focus of improving IT management, infrastructure, networks, applications and services to improve performance capabilities in support of national security. The importance of data management and security ensure the agency operates at its most efficient capacity to investigate and counter terrorists and criminals.
