

[Listen: Alastair Thomson, CIO, NIH National Heart, Lung, and Blood Institute](#)

Season: 2

| Episode: 20

Genomic sequencing requires crucial data management practices that include cloud and high-performance computing.

Wed, 09/04/2019 - 16:24

The NIH agency's CIO discusses the importance of technology and big data to manage research. He brings to the agency a creative background in the animation industry and is now working on various health initiatives, including those researching sickle cell anemia.
