USPTO Leader on the Promises of Automation for Patent Research

An upcoming tool currently in beta will streamline the processes for users filing and monitoring patent applications.

Thu, 10/10/2019 - 15:24

Debbie Stephens
Deputy CIO

USPTO Deputy CIO Debbie Stephens discusses current initiatives underway at the agency and reflects on the benefits emerging technology can bring to the agency's mission in patent research and applications. The agency is working on new tools like the improved MyUSPTO interface and Patent Center to improve the trademark and patent filing processes for users.
