

Blue Prism's Approach to RPA in the Federal Government

Robotic process automation can allow federal workers to perform more meaningful work.

Tue, 01/28/2020 - 17:45

Ron Jones
senior director of technology strategy, Blue Prism

Ron Jones, senior director of technology strategy at Blue Prism, shares why the federal government needs automation and how the technology can help government become more efficient in managing its data. He discusses the difference between robotic process automation and robotic task automation, plus the value these technologies bring to government workers as an aid, not a replacement. With a partnership with Joint Munitions Command, the organization also is improving readiness with the technology.
