

[Representative Michael Burgess Outlines Benefits of EHR Revolution, Privacy Concerns](#)

The Congressman and practicing physician discusses the challenges around reconciling privacy legislation with nationwide EHR systems, and the benefits of AI for healthcare.

Mon, 01/13/2020 - 13:38

Rep. Michael Burgess discusses the complexities of implementing electronic health records systems while contending with differential state-level privacy laws. Burgess also details the promise of artificial intelligence to streamline patient care for conditions requiring frequent testing and modulation like type 1 diabetes, as well as the importance of technical literacy among legislators.
