Listen: Artificial Intelligence Efforts Span NIH, DHA, VA

Season: 1  
| Episode: 1
Leaders from health agencies across government are progressing in applications for the technology.
Dr. Lawrence Tabak, NIH Principal Deputy Director  
Wed, 03/04/2020 - 14:35

Insights from NIH Principal Deputy Director Dr. Lawrence Tabak include promising opportunities in using artificial intelligence across government to improve health care. As the research agency explores the technology, we also address efforts across government like at the Department of Veterans Affairs and Defense Health Agency.
