

[Listen: Michelle Holko, Presidential Innovation Fellow at NIH](#)

Season: 3

| Episode: 12

Exploring the value of data in health science efforts across government.

Tue, 04/21/2020 - 12:48

Michelle Holko had made it a lifelong passion to explore innovations in health data analytics and bioinformatics. Currently detailed as a Presidential Innovation Fellow at the National Institutes of Health's All Of Us Research Program, Holko is working to better engage research participants and researchers. She discusses her background at DARPA plus emerging technologies, wearable devices, vaccine research and more — all incredibly important during pandemics like COVID-19's that government is facing today.
