DevOps Trends and the 'Digital Twin' in Federal Government IT

Partner Content

Innovative approaches to DevSecOps include mimicking the real development space to anticipate problems.

Sun, 05/17/2020 - 13:51

Kirk Kern and Michael Johnson

ThunderCat Technology CTO Kurt Steege and NetApp Office of Technology and Strategy Deputy CTO Michael Johnson discuss the importance for federal government agencies to consider a DevOps and DevSecOps modernization approaches. Plus, the concept of a digital twin can allow DevOps to thrive by creating test environments that are as close to the production environment as possible.
