Leading the Intersection of Tech and National Security

Season: 3
| Episode: 17

Rich Haley's priorities include data management and cloud computing for unique mission needs.

Rich Haley, Executive Assistant Director of IT, FBI

Wed, 06/10/2020 - 15:32

With a career that began with intelligence in the U.S. military, Rich Haley discusses the business and financial considerations of IT modernization and technology implications of the national security mission at the FBI. The Bureau has an important mission to collect, manage and analyze vast amounts of data to serve its workforce of investigators and technologists. Haley describes technology as being a "thread through that fabric" that allows the agency to collaborate and connect
different threats proactively.
