Listen: Federal Leaders Discuss Promise of AI in Public Health

Season: 1  
Episode: 18

Using artificial intelligence to facilitate biomedical research and combat the pandemic.
Mon, 08/24/2020 - 15:31

We gathered leading health researchers, data analysts, and artificial intelligence experts from across the federal government to see how they’re using AI for biomedical research and contributing to the pandemic response. Throughout these conversations, officials highlighted that as nice as it is to pedestal the potential of AI technologies, you can’t get there without getting a handle on your data first. Here are the highlights from the Aug. 13 event featuring speakers from the National
Institutes of Health, Defense Health Agency, DARPA and more.
