Listen: NHLBI CIO Discusses How Tech is Accelerating COVID-19 Research

Season: 1
| Episode: 24

The NIH institute serves a critical role in supporting researchers studying COVID-19. Alastair Thomson, CIO, National Heart, Lung, and Blood Institute
Thu, 10/08/2020 - 14:55

In this episode, the National Heart, Lung, and Blood Institute CIO Alastair Thomson explains how his agency is advancing international research related to COVID-19 with an expansive cloud-based ecosystem, called BioData Catalyst. Thomson also touches on how AI can improve patient health outcomes, the importance of diversity in research, agency funding opportunities and partnerships, and more.
