Listen: Data is Driving Johns Hopkins Researchers to Advance Public Health

Season: 1
| Episode: 28
Safeguarding public health and managing care during the COVID-19 pandemic.
Jonathan Weiner, Health Policy and Management Professor, Johns Hopkins University
Thu, 10/22/2020 - 11:10

Jonathan Weiner, founding director of the Johns Hopkins University Center for Population Health IT (CPHIT), discusses the application of big data to safeguard public health and manage care during the COVID-19 pandemic — including his work on the Population Health Segmentation Framework and the ongoing development of the JHU ACG System.
