Listen: Securing the Supply Chain Takes Coordinated Effort

Federal agencies are working together to secure the IT supply chain.

Thu, 10/29/2020 - 14:27

Securing IT supply chain means preventing counterfeits, end-user malware and vulnerable components as federal agencies modernize their IT and infrastructure. From our Oct. 7 virtual event, hear from CISA National Risk Management Center Associate Director Daniel Kroese and Dell Technologies' Dan Carroll on how agencies are working together to secure the supply chain.
