Listen: Applying Lessons in RPA to Health Care

Challenges

Season: 1
| Episode: 29

How agencies are enabling mission success through robotic process automation.
Fri, 11/06/2020 - 12:29

If there's anything federal technologists can learn from RPA, it's that although it has widespread applicability in many different areas, there are commonalities in overcoming its challenges from which health care leaders can learn. Hear from health and defense leaders on how RPA is enabling mission success. Take a look back at the Nov. 5 virtual event, The Future of RPA.
