Panel: Securing the Cloud with Zero Trust

As agencies look to replace legacy systems with the cloud, zero trust has risen as a best cybersecurity practice.

Fri, 11/20/2020 - 19:59
IT leaders from the Department of Homeland Security, Defense Logistics Agency and Dell Technologies discussed how telework and the shift toward edge computing triggered the need for new cybersecurity strategies, like zero trust. Panelists also discussed how federal agencies and cloud service providers can work together to enhance security, and why it’s important to focus on protecting data instead of the network.

Speakers:

- Luis Coronado, Jr., Director of IT Operations, DHS
- George Duchak, CIO, DLA
- David Stickley, Strategic Programs Executive, Dell Technologies
