Listen: Supporting FDA Drug Reviews With Data Insights

Season: 2
| Episode: 4

The agency is looking to digital tools and automation to streamline regulatory decisions in health.

Justin Scott, Senior Business Informatics Officer, FDA
Fri, 12/11/2020 - 16:45

The Food and Drug Administration's Center for Drug Evaluation and Research office has a vital role in the decision-making that regulates medicines. Senior Business Informatics Officer Justin Scott describes how the agency is using digital intelligence tools like ABBYY and automation to modernize the agency's 30 years of archives and support researchers monitoring public health.
