

## **From Subs to Health IT: Johns Hopkins Lab Exec Revolutionizing Medicine With Engineering**

In our latest podcast episode, Sezin Palmer explains how she takes a systems approach to health to predict and prevent illness.

Wed, 01/09/2019 - 15:54

Sezin Palmer, mission area executive for national health for Johns Hopkins University Applied Physics Lab

Sezin Palmer, mission area executive for National Health for the Johns Hopkins University Applied Physics Lab, discusses her background and current projects.

Palmer uses her education in engineering to revolutionize medicine and health, so that one day people won't have to go to a medical facility to know what's going on in their bodies.

Her first role at APL was a program area manager for submarine warfare, where she worked on keeping Navy submarine crews safe before women were even allowed to

join them.
